PROFILE

Aspiring Software Engineer with hands-on experience building full-stack web and mobile applications using PHP, JavaScript, SQL, and Java. Proven ability to design and implement real-world systems including donation platforms, social networks and service-based applications. Strong understanding of backend development, databases, and user-focused design. Seeking an opportunity to apply technical skills in a real-world environment and grow as a developer.

WORK EXPERIENCE

Academic Tutor - Computer Science FEB 2026- NOV 2026

University of Witwatersrand

- Provided one-on-one and group tutoring sessions in programming and problem-solving concepts
- Simplified complex topics such as **algorithms, data structures and debugging for improved student understanding**
- Assisted students in completing assignments and improving code quality using structured problem-solving approaches
- Improved student performance and confidence through clear explanations and practical examples
- Developed **strong communication and mentoring skills** by working with students from diverse backgrounds

Bursary Connect Platform 2024 - 2025

Side Project

- Developed a full-stack web application to connect bursary students using PHP, HTML/CSS ,Tailwind CSS, and SQL.
- Implemented features including **user profiles, connection requests, document uploads, and real-time communication via WhatsApp integration**.
- Designed and managed the **database structure for user data and interactions.**
- Improved communication and collaboration among students through a centralized platform.
